DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 10-15 and 17-20 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a heat curing agent comprising a rosin having a carboxyl group in the molecule, does not reasonably provide enablement for any other heat curing agent. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims. There is no other heat-curing agent mentioned in the entire specification. One of ordinary skill in the art, at the time the invention was made, would have to undertake undue experimentation to find other suitable heat curing agents for the composition of claim 1. See *In re Wands*, 8 USPQ2d 1400, 1404 (Fed. Cir. 1988). The examples are not helpful either.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

4. Claims 17 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 20 does not make sense. A heat curable adhesive cannot have an adhesive. It is an adhesive.

Art Unit: 1714

6. The term "Thin film" in claim 17 is a relative term, which renders the claim indefinite. The term "thin film" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. How thin is the thin film? How different is the thin film of claim 17 from the film of claim 18?

Allowable Subject Matter

7. Claim 16 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.
